# Precision Spraying + Data

The Smart Apply® Intelligent Spray Control System™ is designed for growers of high-value crops who seek to improve the effectiveness and efficiency of crop protection, while decreasing chemical and labor costs, water use and environmental impact. Growers also receive the added bonus of Smart Apply's data collection and analytics that provides a digital record of each spray event. Available only from Smart Apply, this digital record is stored in the Cloud and supports farm operations as well as regulatory and sustainability reporting.

**Don't forget! The Smart Apply Intelligent Spray Control System is sold as a kit. It can be added to virtually any air blast, over-the-row and GUSS autonomous sprayer, new or used. Installation and support are available from authorized Smart Apply dealers.**
