

### PRECISION DATA POWERED BY PROPRIETARY SOFTWARE

#### Data Collection + Analysis You Don't Get Anywhere Else

Precision spraying is just part of the Smart Apply equation. Its precision data capability automatically collects and uploads a variety of information to the Cloud for analysis, compliance, and planning. With Smart Apply's data, you gain insights into the productivity, profitability, health, and sustainability of your orchard or vineyard. The GPS-enabled software facilitates automatic spraying and records key details like date, time, spray volumes, chemical savings, tree counts, canopy volume, and area covered.

**TREE COUNTS, SIZE, VOLUME OF TREES AND VINES**

**TRACK JOB PROGRESS (INCLUDING LOCATION AND VOLUME)**

**CHEMICAL SAVINGS REPORT**

### CLOUD REPORTING & STORAGE

Losing paper documents is common, but with Smart Apply, your data is quickly uploaded and safely stored in the Cloud, allowing you to easily access both historical and real-time data whenever you're connected to Wi-Fi.

**SPEED REPORT FOR DRIVEN PATH**

#### Optional integration with John Deere Operations Center

Smart Apply gives you the option of sharing your data with John Deere's Precision Ag Operations Center. This unlocks another level of insights and expert support to advance the efficiency, productivity and sustainability of your orchard or vineyard.

# SET. SPRAY. SAVE. PROTECT.

Up to 73% Chemical & Water Reduction

Up to 87% Less Airborne Drift

Up to 93% Less Run Off
